Subject: Deficient Notice of Intention to Commence Small Mining Operations, Colorado Calumet Company, Inc., Maynard Topaz Mine, S/023/0099, Task ID# 2117, Juab County, Utah

Dear Mr. Sutton:

The Notice of Intent to Commence Small Mining Operations (NOI), received by the Division November 21, 2007, is incomplete. The following information is required:

1. The Quad name listed on the NOI is incorrect. It looks like it should be Dugway Pass.
2. The NOI must be signed by an officer of the company as registered with the Utah Division of Corporations.
3. The location map for your site must be at a smaller scale. The one included is at a scale of 1 inch equals 625 feet. Please provide an additional map at a scale of 1 inch equals 2000 feet, showing the location of your mine in relation to mapped roads in the area. The USGS 7.5-minute quadrangle does not show the road to your mine, so I need a map that shows how to drive to your location from mapped roads.
4. The operations map for your site is not complete. Please use a larger scale, 1 inch = 200 feet, and include the locations of work areas, pits, overburden, topsoil, and ore stockpiles, and any other related disturbance.

Reclamation surety is required to be posted by all mining and exploration operations. The surety amount for this site four-acre site is \$17,000 escalated for three years, or \$18,300 escalated for five years. This acreage includes the road between the county road and the mine site. This road is bonded for reclamation in the old Maynard Topaz Mine (S/023/0047), which is being transferred to you. It's acreage, 0.97 acres, is included in the four acres being bonded for your mine operations. You must contact Jed Pearson, Division Minerals Surety Coordinator to complete the reclamation surety and submittal of the reclamation contract. He can be reached at (801) 538-5382 or [bondcoordinator@utah.gov](mailto:bondcoordinator@utah.gov).

In reply, please refer to file number S/023/0099. Thank you for your cooperation.

Sincerely,

Susan M. White  
Mining Program Coordinator  
Minerals Regulatory Program
